

Max Vilchevskiy

Senior iOS Engineer

Kyiv, Ukraine · Remote

vil4max@gmail.com · [Telegram](#) · [LinkedIn](#) · [Portfolio](#)

Summary

Senior iOS Engineer with 10+ years of commercial experience. I have shipped consumer apps from scratch and stayed with marketplace products long enough to extract shared SDKs from them. Recent work: Premium Subscription as a multi-host SDK, Drinkit's first production iOS app with the launch team, and a watchOS Voice AI client that relays live audio through iPhone. I use AI tools in everyday delivery.

Skills

Swift · SwiftUI · UIKit · Swift Concurrency

SPM · Multi-host SDK · Modularization · Analytics Infrastructure

WatchConnectivity · Realtime Audio Streaming · AI-Assisted Development

Experience

- **Senior iOS Engineer · GlobalLogic**

Jan 2026 - Jun 2026

Apple Watch Voice AI. Fixed-term R&D / demo contract · watchOS voice companion

 - Built the watchOS conversation UI, including the listening-state control, so field workers could keep a voice-first companion accessible while hands were occupied.
 - Worked on the iPhone relay for realtime WebSocket and audio after direct Watch networking was not retained, so the voice client could run under watchOS constraints.
 - Mapped structured AI/backend responses to deterministic on-device navigation, state changes, warnings, and UI actions.
 - Delivered the R&D / demo package for client executive evaluation under a fixed-term R&D contract.

watchOS · WatchConnectivity · Realtime Audio · AI Command Flows
- **Senior iOS Engineer · PASHA Holding (Birmarket)**

Apr 2022 - Jan 2026

Birmarket. Production App Store marketplace and loyalty · ~20+ iOS · ~50+ mobile

 - Took primary iOS responsibility for Premium Subscription on the production App Store marketplace and reimplemented it as a configurable multi-host SDK with shared analytics, so Birmarket, Birbank, and M10 integrated the same subscription implementation using host-supplied theme, endpoints, and auth token.
 - Extracted the Loyalty shared analytics layer and packaged Premium Subscription as a remote Swift package; also participated in broader SPM-oriented extraction in a large production iOS codebase.
 - Delivered marketplace and loyalty flow updates during the Umico to Birmarket expansion in Azerbaijan.

Multi-host SDK · Modularization · Analytics Infrastructure
- **iOS Engineer · Drinkit**

Feb 2020 - Feb 2022

Drinkit. Coffee ordering · ~10+ startup · offline staff also tested

 - Built the greenfield production iOS app from scratch with the launch team (three iOS engineers) and shipped it to the App Store.
 - Implemented and evolved drink customization around interdependent options, shop-level availability, and backend-authoritative state, refining user flows and scenarios as the product moved beyond ready drinks.

- Helped design and integrate contextual offers, connecting client presentation to backend-decided offers in the ordering flow.

UIKit · Product Customization · Contextual Offers

○ **iOS Developer · SOLVVE**

Jan 2019 - Feb 2020

PLAYHERA. Esports tournaments · production App Store client

- Delivered assigned production tasks in the tournament-management area of an existing App Store esports client.
- Adapted to RxSwift reactive feature flows within an established UIKit codebase and review practices.

Swift · UIKit · RxSwift

○ **iOS Developer · Early commercial work**

Dec 2013 - Dec 2018

Consumer, fintech-adjacent, and client delivery

- Delivered commercial iOS work across Electus (Keychain wallet flows), GBKSoft (Clovis App Store and CoreBluetooth BLE), Amconsoft (AcuCharting SceneKit/Core Data), Tap4Parking (Google Maps SDK), and iCenter (AlphaSMS App Store).
- Details in Portfolio: vil4max.github.io.

Education

Donetsk State Academy of Management (Donetsk, Ukraine) - coursework in Management of the Production Sphere / Production Management
