

Max Vilchevskiy

Senior Software Engineer | iOS | AI-Augmented Engineering

Kyiv, Ukraine · Remote

vil4max@gmail.com · [Telegram](#) · [LinkedIn](#) · [Portfolio](#)

Summary

Software engineer with 13 years of commercial experience, from greenfield startups to large-scale consumer products. Joined Umico during its early marketplace stage and contributed across product development, including ordering, delivery, and loyalty flows, as the platform evolved into Birmarket. In the later phase, took primary iOS ownership of Premium Subscription and designed a reusable multi-host SDK for Birmarket, Birbank, and M10. The work included technical planning, API boundary definition, onboarding, code review, modularization, and production delivery, leveraging deep iOS expertise and fintech experience. Uses AI-assisted workflows across planning, implementation, testing, and code review, retaining ownership of technical decisions and verification.

Skills

iOS & Apple Platforms: Swift · Objective-C · UIKit · SwiftUI · Foundation · iOS SDK · Xcode · Swift Concurrency · Combine · Auto Layout · URLSession · REST APIs · WebSockets · Core Data · Keychain Services · StoreKit 2 · watchOS · WatchConnectivity · Realtime Audio Streaming

Architecture & Delivery: Swift Package Manager (SPM) · Modular Architecture · MVVM · Clean Architecture · Dependency Injection · Protocol-Oriented Programming · XCTest · Xcode Instruments · Performance Optimization · CI/CD · App Store Connect

AI Engineering & Development: Apple Foundation Models · Context Engineering · Agentic Workflows · Tool Calling · Structured Outputs · AI-Assisted Development

Experience

Senior iOS Engineer · GlobalLogic Jan 2026 - Jun 2026

Apple Watch Voice AI. Fixed-term R&D / demo contract · watchOS voice companion

- Built watchOS conversation UI and mapped structured AI/backend responses to navigation, application state, warnings, and UI actions.
- Implemented the iPhone relay for real-time WebSocket and audio communication under watchOS runtime constraints for the delivered R&D demo.
- Owned the technical design and implementation of key watchOS client flows, making architecture decisions within a collaborative R&D team.
- Subsequently participated in an internal evaluation of AI-assisted iOS delivery, creating scenarios and reviewing implementation defects, corrections, and regressions.

watchOS · WatchConnectivity · URLSessionWebSocketTask · AVFoundation

Senior iOS Engineer · PASHA Holding Apr 2022 - Jan 2026

Birmarket. Production marketplace and loyalty · 20+ iOS engineers · 50+ mobile team

- Joined Umico during its earlier marketplace stage and delivered marketplace features across ordering, delivery, and later loyalty as the platform evolved into Birmarket.
- Designed and rebuilt Premium Subscription as a configurable multi-host SDK for integration into Birmarket, Birbank, and M10, taking primary iOS responsibility for the feature.
- Independently decomposed the Premium Subscription migration and formed its implementation backlog, then coordinated host/SDK API boundaries with backend and other teams.
- Onboarded a new iOS engineer, coordinated feature allocation between engineers, and took part in mandatory code reviews.

SwiftUI · Clean Architecture · Swift Package Manager (SPM) · Multi-host SDK · Xcode Instruments

- **iOS Engineer • Drinkit**

Feb 2020 - Feb 2022

Drinkit. Digital-first coffee chain · greenfield launch to product scale-up

- Built and launched the greenfield Drinkit iOS app as one of three iOS engineers, then continued developing it as the product evolved from its first coffee shop into a broader digital coffee-chain experience.
 - Implemented substantial parts of drink customization throughout the product's evolution.
 - Integrated contextual offers into the ordering flow, connecting client presentation with backend-driven customer and product context.

UIKit · Combine
- **iOS Developer • SOLVVE**

Jan 2019 - Feb 2020

PLAYHERA. Esports tournaments · production App Store client

- Implemented tournament-management and profile/settings functionality in an existing production UIKit application using RxSwift and established team conventions.
 - Worked in the tournament-management area of a live esports product with teams, players, schedules, matches, and results.

Swift · UIKit · RxSwift
- **iOS Developer • Electus**

Jul 2018 - Nov 2018

Electus. Greenfield Web3 wallet startup · primary iOS contributor

- Built wallet creation/import, balances, asset visibility, and market-data charts as the primary iOS contributor to a greenfield consumer wallet.
 - Implemented Keychain-backed storage, Touch ID protection, and seed-phrase verification; integrated Ethereum testnet transaction tracking and Bitcoin balance/network data.

Swift · UIKit · Keychain Services · Biometric Authentication (Touch ID) · Web3 · Ethereum
- **iOS Developer • Early commercial work**

Dec 2013 - Jun 2018

Consumer and client delivery

- Built and delivered commercial iOS applications across client and startup projects, including App Store releases for AlphaSMS, a bulk messaging client, and Clovis, a US wellness storefront. Implemented AcuCharting, an iPad charting product using SceneKit and Core Data, and built Tap4Parking map and location flows with Google Maps SDK and Core Location. Covered end-to-end mobile delivery across UI, navigation, API integration, debugging, client requirements, and release preparation, alongside BLE hardware and existing-app maintenance work.

Additional contract

FinTech R&D

Part-time project · Client-delivered beta

- Delivered a beta iOS client with authentication, KYC, gold portfolio and price charts, and buy/sell flows; integrated Stripe and Apple Pay into the purchase experience.
